

Go-live in Belgium & France: EXAA is Expanding!

02.06.2025

EXAA's **10:15 market coupling auction** will officially launch in **Belgium and France** on **23 September 2025!**

This development marks a key milestone in the ongoing integration of European energy markets and opens new access for trading participants in the region.

Following the successful start of the 10:15 auction in the Netherlands, this expansion creates fresh opportunities for market access, cross-border trading, and improved price signals. It also supports our shared goal of building a more integrated, competitive, and efficient power market across Europe.

Looking ahead, the **12:00 market coupling auction** - covering the **Netherlands, Belgium, and France** - is in preparation. This next step will include our cross-auction spreads, offering additional flexibility and trading strategies for market participants.

We invite both current and prospective partners to explore the benefits of participating in these expanded markets.
